Standards Schema
Old vs. New

PowerSchool

Michael Pietrzak
Solutions Engineer

OLD TABLE
Standards_Migration_Backup

- OLD Standards table, no longer used by the application

- **Standards** table was renamed
  Standards_Migration_Backup

- **Standards** table now viewable as Standards View

- **Standard** table has been created in its place

PowerSchool

WHENCREATED	TIMESTAMP(6)
WHOMODIFIED	VARCHAR2(100)
WHENMODIFIED	TIMESTAMP(6)

StandardGradeRollupComment

- Stores comments given to a student regarding standard grade rollup

- Based on
  - Student (StudentDCID)
  - Grade Level (GradeLevel)
  - Standard Grade Rollup (StandardGradeRollupID)

NEW TABLE (with 9.0.0) StandardCourseAssoc

This table is used to associate a standard to a course in a specific year. When the End of Year (EOY) process is run, a new set of standard course associations are created to retain the history of standards course associations for previous years. This association record also contains several grade calculation settings pertinent to a particular standard, course, year association such as calculation weight for final course grades, and whether the standard is calculated automatically by lower level standards.

Column Name	Data Type	Description
CoursesDCID (ver9.0.0)	Number(10,0)	Foreign Key. An internal identifier, DCID, of the associated course record. Indexed. Required.
IsActive (ver9.0.0)	Number(1,0)	1 indicates the standard is available for teachers to enter in standards grades. Valid values: 0 = False, 1 = True. Defaults to 1. Required.
IsCalcByLowerStandard (ver9.0.0)	Number(1,0)	Indicates whether the higher level standard is calculated by the lower level standards. Valid values: 0 = No, 1 = Yes. Defaults to 0. Required.
IsPrimary (ver9.0.0)	Number(1,0)	Indicates whether this standard is a primary standard for a course. In PowerSchool 9.x, all standards assigned to courses are considered primary. Valid values: 0 = No, 1 = Yes. Defaults to 1. Required.
StandardCourseAssocID (ver9.0.0)	Number(16,0)	Primary Key. Unique sequential number generated by the application. Indexed. Required.
StandardID (ver9.0.0)	Number(10,0)	Foreign Key. An internal identifier, of the associated Standard record. Indexed. Required.
Weight (ver9.0.0)	Number(6,0)	Defines the numerical weight associated with the standard.
WhenCreated (ver9.0.0)	Timestamp(6)	Date and time the record was created. Defaults to system date. Required.
WhenModified (ver9.0.0)	Timestamp(6)	Date and time the record was modified. Defaults to system date. Required.
WhoCreated (ver9.0.0)	Varchar2(100)	The user login that created the record. Defaults to database user. Required.
WhoModified (ver9.0.0)	Varchar2(100)	The user login that modified the record. Defaults to database user. Required.

PowerSchool

NEW TABLE (with 9.0.0) StandardCourseAssoc

- Allows cataloging of Standards
  - Associates a standard to a course in a specific year
  - Similar to way Course Catalog works

- Allows grade calculations for standards settings
  - Course, year associations
  - Calculation Weight for final course grades
  - Allows automatic calculation by lower level standards

NEW TABLE (with 9.0.0) StandardCourseAssoc

- End of Year (EOY) Process
  - Creates new standards course associations for previous years
  - Retains old association history for previous years

- Based on
  - Standard (StandardID)
  - Course (CoursesDCID)
