

Introduction to SQL

Chris Alldredge
Trainer/Consultant

PowerSchool University 2011

Objectives

After completing this course, you will be able to:

- Become the database whisperer in your district
- Understand what it might mean when your friends choose “It’s Complicated” for their relationship status on Facebook
- Give the “birds and the bees” talk about joining database tables

Meet the Trainer

Christopher Alldredge

Program Manager, Strategic Initiatives

- **Bachelor of Science**
Elementary Education
Southern Utah University

- **Master of Arts**
Educational Counseling
University of Phoenix

- **Customer Education**
Pearson
Joined in 2000
- **PowerSchool University**
Instructed at EVERY PSU

- **eCloud Learning**

The Alldredge Family

What is SQL?

1

What is SQL?

How did you learn your first language?

What is a Relational Database?

2

What is a Relational Database?

A table is similar to a spreadsheet...

A table is similar to a spreadsheet...

ID	Last_Name	First_Name	Grade_Level	Gender	DOB	SchoolID

Columns

A table is similar to a spreadsheet...

ID	Last_Name	First_Name	Grade_Level	Gender	DOB	SchoolID

ROWS

A table is similar to a spreadsheet...

ID	Last_Name	First_Name	Grade_Level	Gender	DOB	SchoolID
104	Adams	Drew	10	M	9/15/1996	100
105	Anderson	Michael	11	M	2/17/1995	100
106	Andrews	Sam	10	M	12/3/1995	100
107	Brady	Suzy	11	F	4/15/1995	100
108	Bowen	Brook	11	F	1/5/1995	100
109	Clements	Jason	12	M	3/2/1994	100
110	Cox	Chelsea	12	F	7/24/1994	100
111	DeMonja	Rocky	10	M	11/29/1995	100
112	Dunn	Amy	9	F	7/30/1997	100

Data

Relationships between tables...

Relationships between tables...

Students

ID	Last_Name	First_Name	Grade_Level	Gender	DOB	SchoolID
104	Adams	Drew	10	M	9/15/1996	100

Relationships between tables...

Now It's Your Turn

Complete hands-on activity 1:

Examining Tables and Diagrams

Table Relationship Diagrams

Table Relationship Diagrams

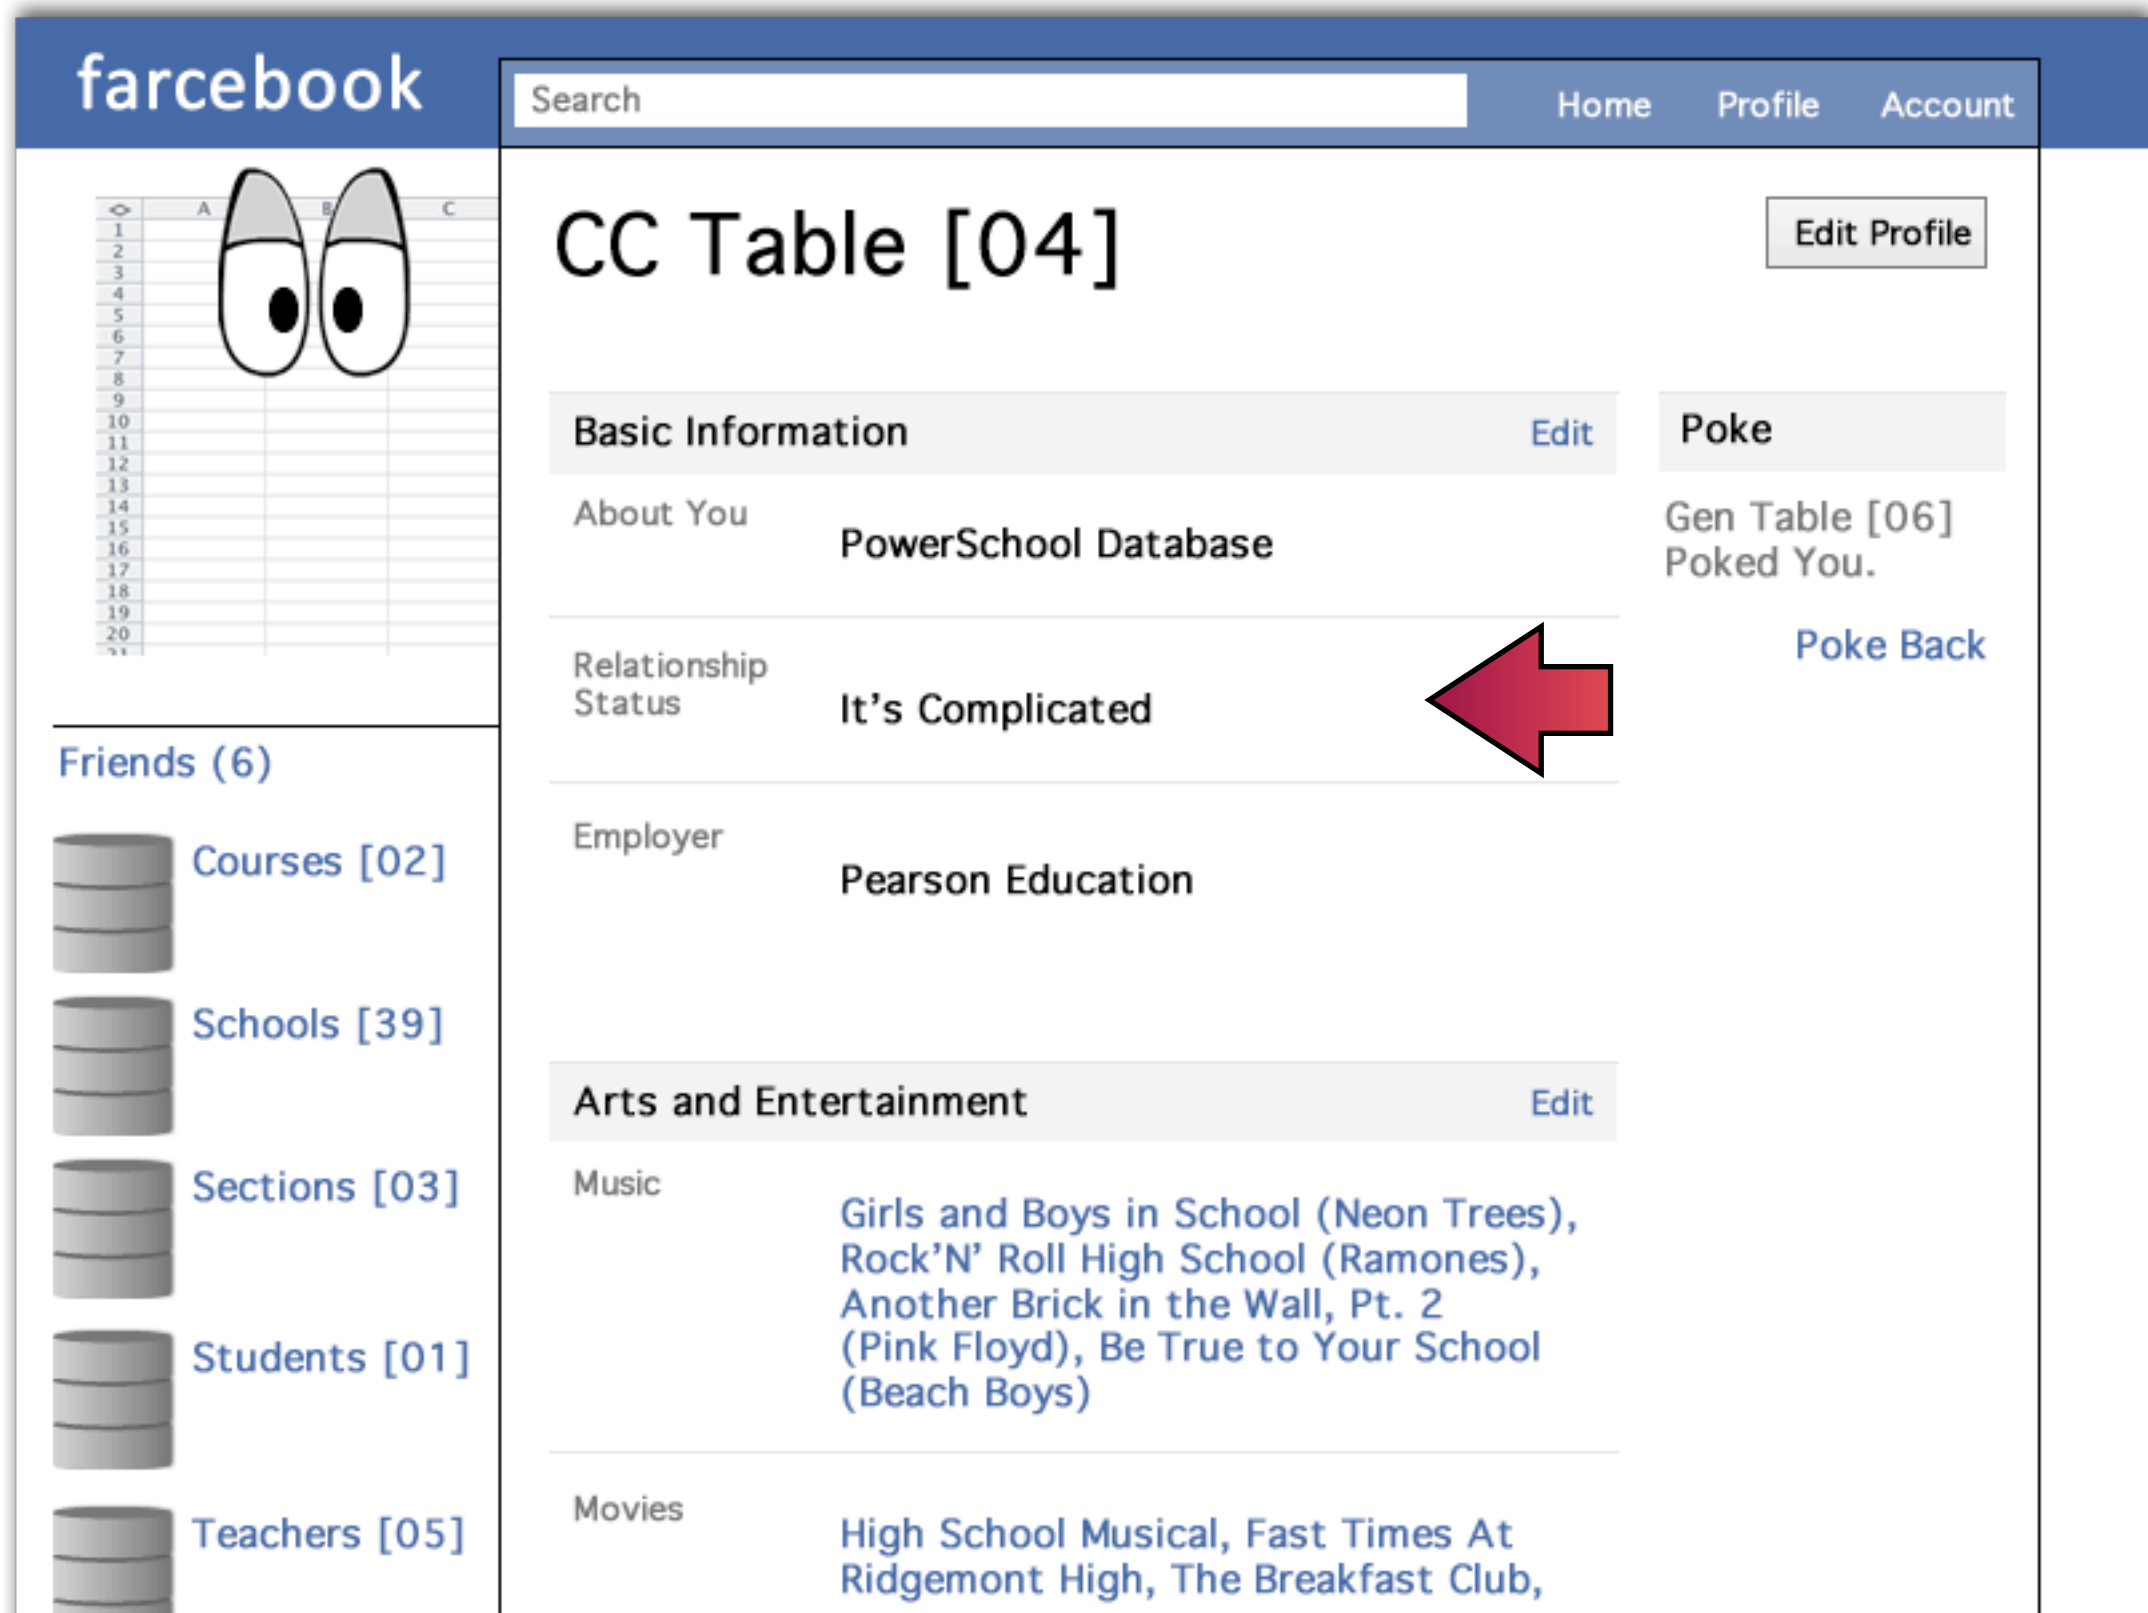

Table Relationship Status

What Are Your Query Needs?

3

What Are Your Query Needs?

Quick Export

- Primary tables are Students and Teachers
- Export data from limited additional tables
- Limited to the school you are working in
- Can't save queries

Direct Database Export

- Export from any table
- Match fields from other tables
- Export from multiple schools
- More filtering
- Can't save queries

Export Using Template

- Export data from Students, Courses, CC, Teachers, and StoredGrades
- Limited to the school you are working in
- CAN save queries

SQL

- Export data from any table
- Export from unlimited tables simultaneously
- Export from multiple schools
- Detailed data filters
- CAN save queries

The Language of SQL

4

SQL - The Database Whisperer

SQL

Basic SQL Grammar and Vocabulary...

Get What?

SELECT *A list of names* field name (s)

From Where?

FROM *The Students table* table

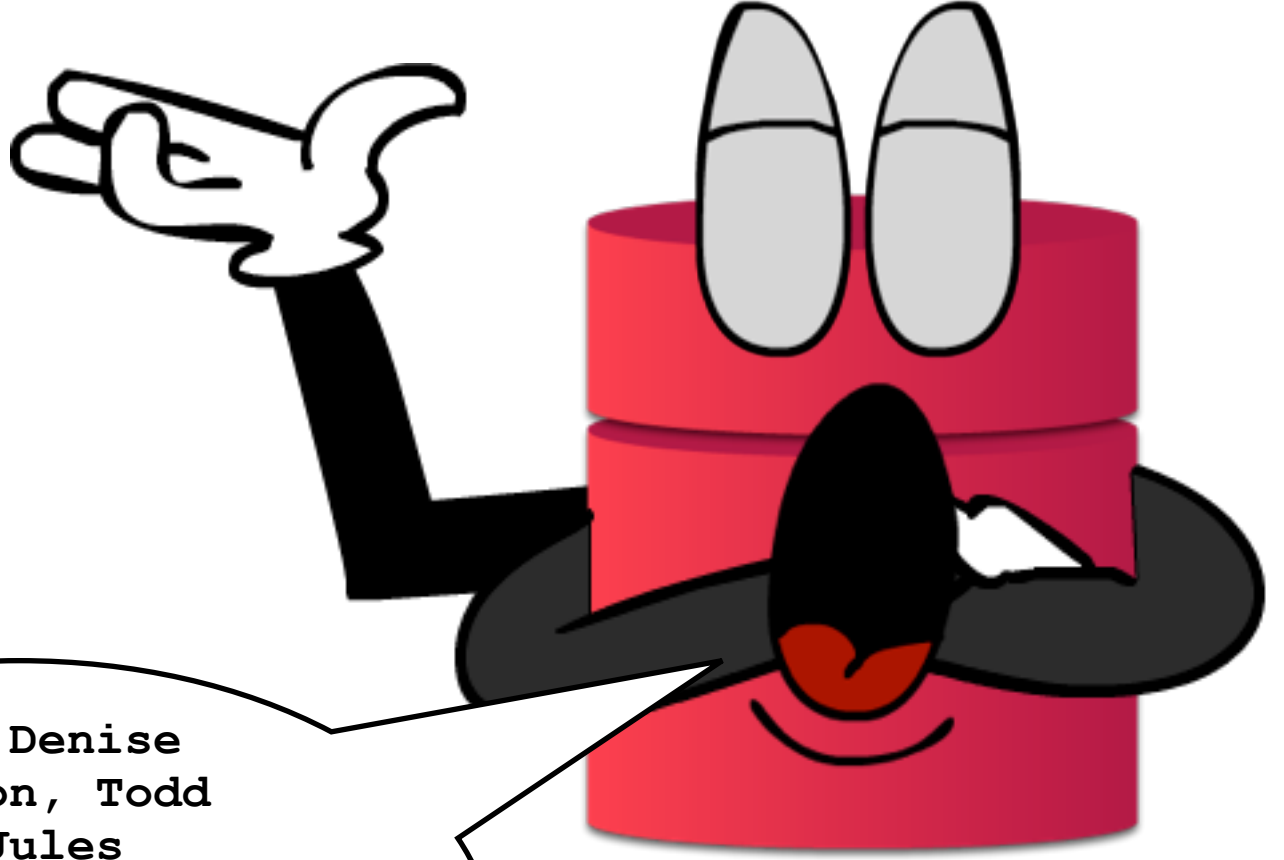

Special Instructions:

WHERE *Only graders only*

Basic SQL Grammar and Vocabulary...

```
SELECT lastfirst  
FROM students  
WHERE grade_level=9
```

Adams, Denise
Anderson, Todd
Chen, Jules
Dunn, Amy
Fenton, Peter
Fuentes, Jose
Harris, Megan
Jensen, Jamal
...

Now It's Your Turn

Complete hands-on activity 2:

Writing SQL Queries

What if a single table isn't enough?

What if a single table isn't enough?

JOIN

The “Birds and Bees” of a JOIN...

How a JOIN Works

Students

ID	Last_Name	First_name
109	Adams	Denise
110	Anderson	Todd
111	Chen	Jules
112	Dunn	Amy

StoredGrades

StudentID	Course	Grade
109	Algebra	A
109	Biology	B+
109	Art	A-
111	Geometry	B-
111	US History	A
112	Algebra 2	C+
113	Chemistry	B-
114	Civics	A

Results

Adams	Denise
Adams	Denise
Chen	Jules

Using Views

5

What's a View?

Gen Table [06]

What's a View?

Students [01]

ID

First Name

Last_Name

Student_Number

Grade Level

Gender

SchoolID

Schools [39]

ID

School_Number

Name

Address

Abbreviation

SchoolPhone

Principal

Gen [06]

ID

Cat

Name

Value

Value2

SchoolID

YearID

PSSIS_Student_Demographics

Name

Student_Number

Current_School_Abbreviation

Gender

Ethnicity_Name

Other Types of JOINS

LEFT OUTER JOIN

Now It's Your Turn

Complete hands-on activity 3:

Using Views in SQL Queries

Let's Review...

Question 1

Who Am I?

```
SELECT name  
FROM tvtherapist  
WHERE degree='phd' AND books=13 AND  
friend='Oprah'
```

Question 1

Question 2

What is a set of linked tables?

A Relational Database

B A Buffet

C A Spreadsheet

D Something cool in Excel

Question 2

What is a set of linked tables?

A Relational Database

B A Buffet

C A Spreadsheet

D Something cool in Excel

Question 3

What represents each instance in a table and must be unique and not null?

A Foreign Key

B Special ID

C Primary Key

D Important ID

Question 3

What represents each instance in a table and must be unique and not null?

A Foreign Key

B Special ID

C Primary Key

D Important ID

Question 4

What does the WHERE vocabulary do in SQL?

A Adds a Filter

B Makes a JOIN

C Names an Alias

D Sorts Data

Question 4

What does the WHERE vocabulary do in SQL?

A Adds a Filter

B Makes a JOIN

C Names an Alias

D Sorts Data

Question 5

Which of the following pulls data from multiple tables together into a “virtual table?”

A jQuery

B MS Query

C JavaScript

D A View

Question 5

Which of the following pulls data from multiple tables together into a “virtual table?”

A jQuery

B MS Query

C JavaScript

D A View

Key Points

- Relational Database Structure
- Basic SQL Vocabulary
- Basic Joins
- Database Views

Question and Answer

Don't Forget...
