PowerSchool

PowerSchool has been updated to provide parents with a "single sign-on" for your children. You will no longer need to have a user name and password for each of your children to access PowerSchool information.

All parents, regardless of the number of children you have, logging on to PowerSchool for the first time this school year you will need to "create an account."

Click on the link below to access the PowerSchool log in screen. Click on the "create account" button to start the process.

Once you have created your account you will need to login to PowerSchool to access student information.

Create an Account

Create a parent/guardian account that allows you to view all of your students with one login account. You can also manage your account preferences. Learn more.

Create Account

PARENTS:

First time you sign in for 2010-2011, please click here.

STUDENTS: Log in the same as you always have using the username and password given to you by your school.

PARENTS: We have enabled a new feature called Single Sign On (SSO). If you have not created your SSO account yet please do so by clicking "Create Account" above. You will be asked to use your login information from last year for each student to connect to your account. Once created you'll never need those again. Each parent/family member can now make separate accounts to access information for each student they wish to view using a username and password of your choosing. If you have any questions please feel free to contact your building's administration.

Thank you for not using Internet Explorer
